

Wagga Wagga is located in southern NSW. Its summers are hot with low humidity while winters are cold with the potential for frequent frosts. Despite the challenging climate, with temperatures beyond the optimum range for most orchid species, orchid growers have adopted a range of strategies to be able to successfully grow a great diversity of orchid species.

Monthly mean maximum and minimum temperatures and daily high maximum and low minimum temperatures and number of days where ground temperatures are below -1°C at Wagga Wagga, New South Wales.
